

## **What is Linux+, and why should I take this course?**

We're really glad you asked! Linux+ (2015 objectives) is a vendor-neutral certification that offers a framework for acquiring working knowledge of Linux for IT professionals working as junior-level system administrators, as well as those working in Web and software development. You should take this course if you want essential skills for working in a variety of job roles in Web, systems and network administration.

## **What will I learn?**

- ◆ System architecture
- ◆ Linux installation and package management
- ◆ GNU and Unix commands
- ◆ Devices and Linux filesystems
- ◆ Filesystem hierarchy standard
- ◆ Shells, scripting and data management
- ◆ User interfaces and desktops
- ◆ Administrative tasks
- ◆ Essential system services
- ◆ Networking fundamentals and security

## **What are the course prerequisites?**

CompTIA A+ and Microsoft Networking Fundamentals or Network+ certification is all you need to take this course. Depending on your experience, these prerequisites can be waived with instructor approval.

## **Can I take this class online?**

Yes, you can. The class is designed to be offered online and is available 24/7. The best feature is the instructor assigned to you – on day 1 – for the duration of your class. They are 100% confident that if you follow their direction, you will become certified. Instructors are available via text, phone, or email.

## **How long will it take to finish?**

Many students complete the class sooner, but we give you five months so you can work at a pace that fits into your current commitments.

## **Who should take this class?**

Anyone who believes operating systems are here to stay should take this class, and that pretty much means everyone.

## **When does the class start?**

This class starts most Mondays. Register early to get the start date that works for you.
